

```

1 import java.util.*;
2 class main{
3     public static void main(String[] args){
4         Scanner x=new Scanner(System.in);
5         System.out.println("enter the lower range:");
6         int l=x.nextInt();
7         System.out.println("enter the upper range:");
8         int u=x.nextInt();
9         int t;
10        int sum;
11        int tot=0;
12        int c;
13        for(int i=l;i<=u;i++){
14            t=i*i;
15            c=t;
16            while(c>0){
17                sum=c%10;
18                tot+=sum;
19                c=c/10;
20            }
21            if(tot<10 && t<=u){
22                System.out.println(t);
23                tot=0;
24            }
25        }
26        else{

```

Output

```

enter the lower range:
enter the upper range:
1
4
9

```

Level 3 — Hard (H) Perfect Squares — Numbers

✓ Submitted

Write a Program to create a list of all numbers in a range which are perfect squares and the sum of the digits of the number is less than 10.

Sample Input & Output:

Enter lower range: 1

Enter upper range: 40

[1, 4, 9, 16, 25, 36]

Test case:

1. Enter lower range: 50

Enter upper range: 100

2. Enter lower range: 5

Enter upper range: 8

3. Enter lower range: 10

Enter upper range: 5

4. Enter lower range: 500

Enter upper range: 500

5. Enter lower range: 0

Enter upper range: -100

Testcase:

Your Code

```
1 import java.util.*;
```

Output

```
enter the lower range:
```

Level 3 — Hard

(H) Students-Teachers — Control

✓ Submitted

Write a program to find the number of student users in the college, get the total users, staff users details from the client. Note for every 3 staff user there is one Non teaching staff user assigned by default.

Sample Input:

Total Users: 856

Staff Users: 126

Sample Output:

Student Users: 688

Testcase:1. Total User: 0

2. Total User: -143

3. Total User: 1026, Staff User: 1026

4. Total User: 450, Staff User: 540

5. Total User: 600, Staff User: 450

Your Code

```
1 import java.util.*;
2 class main{
3     public static void main(String[] args){
4         Scanner x=new Scanner(System.in);
5         System.out.println("total users:");
6         int n=x.nextInt();
7         System.out.println("staff users:");
8         int p=x.nextInt();
9         int tot=n-p;
10        int fin=tot-(p/3);
11        System.out.print(fin);
12 }
```

Output

```
total users:
staff users:
688
```
